Broken Lot of Union Suits, values to 50c, at	25c

## SUM TO BE SPENT FOR JULY FOURTH CAUSE OF DEBATE

Commissioner Bear Refuses to Accept \$100 Donation From City for Fireworks.

SAID HE WOULDN'T NEED IT

Council Thinks \$152 Is Not Sufficient for Celebration and Appro- priates More.

The weighty subject of how much money should be spent on the Fourth of July celebration, which is to be held the afternoon of the nation's birthday at Long View park for the benefit of the children of the city, furnished the topic of a vigorous debate at the weekly meeting of the city commission yesterday afternoon.

Commissioner Jonas Bear, who has been collecting funds for the event, refused to accept the \$100 which the city had donated for the affair, claiming that he had enough money for the celebration without it.

"If you don't take the city's money,"

after you have solicited from the public with the understanding that the city was giving \$100 toward the celebration, you will be guilty of accepting money under false pretenses," declared Mayor H. M. Schriver.

"I have raised \$152 for the day and I think this is sufficient," replied Commissioner Bear. "To spend a \$100 for daylight fireworks and \$50 for a band would be plenty. I think the expenditure of any more money would be an extravagance."

However, a motion made by Mayor Schriver that the sum of \$250 be spent for fireworks and \$50 for a band, carried, Commissioner Bear alone voting no.

### New Uniforms.

On motion of Commissioner Hart new uniforms for the police and fire departments were purchased from J. J. Ulmeyer at a cost of \$18.50 a suit. A filing cabinet for plans and specifications, costing \$148.55 from E. O. Valle, Jr., and a strength-computing slide rule to test the strength of timbers, costing \$15, were ordered purchased for the office of J. H. Stapp, building inspector.

Mrs. Vashit Bollman appeared before the commission to ascertain what action had been taken, relative to a petition filed with the commission recently, urging the acceptance of the proposition of E. H. Guyer to dedicate to the city land for the entrance to the east end park. Mayor Schriver announced that City Engineer Wallace Treichel was busy on the proposition and that as soon as he made a report the project would be pushed.

### New Sidewalks.

Ordinances for cement sidewalks on Eighth street, Fourth to Thirteenth avenues and for the Fifteenth street district were adopted, and one for paving of Twentieth street, Eleventh to Seventeenth avenues, was considered. This latter project was up a year ago. Recently a dairy wagon upset in one of the large holes in the pavement and scattered glass, resulting in a horse severely injuring its foot. Mayor Schriver declared that the owners of both outfits contemplated suits against the city for damages

and he thought it about time extensive repairs on the street were made.

### Another Touring Car.

By a vote of four to one, Commissioner Bear voting no, a resolution carried that a Ford automobile be purchased for the joint use of the city engineer and the superintendent of waterworks. The purchase price was fixed at \$495.

An ordinance for a new sidewalk on Eleventh street, from Fourteenth avenue, south to the McInnis place, was considered. W. E. Bailey was authorized to bring the alley to grade from Twenty-fourth to Twenty-fifth streets, between Twelfth and Thirteenth avenues, the work to be subject to the approval of City Engineer Wallace Treichel.

Mayor Schriver reported that he had investigated the matter of galvanized iron receptacles for ashes in two sizes, 25- and 40-gallon capacities. He was not prepared to submit figures.

### Denies Statements.

Dr. G. G. Craig, health commissioner, brought up the matter of recent newspaper criticism of conditions at the detention hospital, and denied them. A communication from William Nickell, formerly a nurse at the institution, addressed to the commission, was read, in which assertions contained in The Argus, relative to the hospital conditions, were denied. Exception was also taken to an article which appeared in the Tri-City Labor Review concerning the conditions at the detention hospital.

Commissioner Hart declared that a public official must expect criticism and that Mr. Nickell should not feel offended at what the newspapers had said; that patients in the institution would gladly testify relative to sanitary conditions; that the place was as comfortable and clean as it could be made without sewer and water facilities and that there was no need of the official investigation which Mr. Nickell demanded.

### Court Room Plans.

Commissioner Hart brought up the subject of improvements for the court room of Police Magistrate C. J. Smith and said Building Inspector J. H. Stapp

figured the work could be done for about \$300.

George B. Jackson, 1720 1/2 Lincoln court, appeared before the commission and asked that the city engineer establish a grade for the alley at the rear of his premises and that as soon as this was done W. E. Bailey had agreed to grade the alley and make it passable. It was arranged to have this done.

A water bill of Mrs. Ellen Pearson, 2223 Fourth avenue, for \$9, which has been standing since 1911, was re-bated on request of John Murrin.

Two bills of H. Roggenkamp against the city were presented. One was for \$16 for 16 days' service of a horse in the street department of the city and the other for \$35 for depreciation in value of the horse through a recent accident. The claims will be taken up later in the week.

### Wants Street Opened.

Myron Jordan asked the commission to open up Forty-sixth street at Fourteenth avenue and the council promised to make a trip of inspection this week to the location in question.

P. F. Trenkenschuh was allowed the sum of \$17,000 in waterworks bonds for the installation of the Eighteenth avenue district watermain.

### SAYS MUSCATINE GIRL WAS "CONVERTED" HERE

Muscatine, Iowa, June 23.—Miss Bachelor of Rock Island appeared at the police station yesterday noon and informed the officers that she knew the whereabouts of Miss Tobias, that she understood had been missing from her home in this city for the past week. It was not known that the police had been looking for the girl, but this fact was admitted yesterday. Miss Bachelor stated that the girl had been under her care at Rock Island and had been converted. She wanted to get financial aid from this city to send the girl to a home in Kansas City, where she would be taught and looked after. Miss Bachelor stated that she was pastor of the Friends' church.

## PUBLISHES A BOOK ON ADVERTISING

G. H. E. Hawkins Puts Years of Experiences in Publicity Into Print.

There has just come from the press a new book that might well be called the advertising man's text-book on newspaper advertising. The book is newspaper advertising by G. H. E. Hawkins, advertising manager of the N. K. Fairbank company. Mr. Hawkins' new book covers every phase of newspaper advertising in a simple, logical manner. It is the only book of the kind ever written and is essentially a text book for the national advertiser, the retail advertiser, the newspaper man, the advertising collector, and the student of advertising.

An interesting feature about newspaper advertising is that it is not theory, but is written from the viewpoint of a man who has for many years had charge of one of the largest advertising appropriations in the country, a great part of which has been spent in the newspapers. Mr. Hawkins is probably one of the country's best versed advertisers in the value of the newspaper as an advertising medium. The data for his new book was gathered from his years of experience. In it he has eliminated all theory and gotten down to actual facts based upon dollars and cents results.

In defining the newspaper Mr. Hawkins says "The newspaper chronicles the activities of the world; it is the record of the world's work. The newspaper is the barometer of public opinion; it is the thermometer of the nation's standing and progress; it is the chronometer of birth and death; it is the speedometer of local business."

"The newspaper is a part of our every day life, and is consequently the place to advertise the necessities as well as the luxuries of the day."

Newspaper advertising contains

over 200 pages, 8 1/2x11 inches. It is bound in cloth, and contains over 500 illustrations—with a frontispiece, "The Textbook of the World," by Ralph Wilder, the famous cartoonist. There are 60 pages of inserts, each four times the size of the book page, showing over 500 national and local newspaper advertisements with comments and criticisms. These advertisements are intended to show the force of certain features of advertising, and give the good and the bad points of the various styles of advertising. Each page of these inserts is four times the size of the book page. A special section of the book has been devoted to a series of original advertisements for over forty lines of business. Each list has from six to ten ads.

## JUNE RISE IS ENDED AND RIVER IS FALLING

Falling stages in the Mississippi river are due from now on, the June rise having come to an end yesterday when 9.8 feet was attained. The rise did not amount to as much as had been expected and little or no damage to crops planted in the bottoms has resulted. The effect of the rains in the north which preceded the rise probably will be to keep a sufficient stage during the summer months to insure that traffic on the stream will not suffer the too common handicap of low water.

### Pure Water on Boats.

One of the features of the arrangements on the Streckfus boats this summer is the using of city water on the boats. Heretofore the water was pumped out of the river and filtered on the boat. As the water secured from the city has passed a state test it is considered more sanitary. The Helen Blair of the Winward line uses artesian water altogether.

Ottawa, Ill., June 23.—Three fishermen were drowned in the Illinois river at LaSalle when their boat capsized during a storm. They could not swim. The drowned men were Lucas Plintz, Frank Zargore and John Godina.

## INSURGENTS WILL DROP THE FIGHT

Woodmen Faction at Peoria Said to Be Satisfied With Winning on Rates.

Peoria insurgent Woodmen appear satisfied to drop the fight after winning out on the rate issue, according to the Star. Peoria has been a center of insurgency, and those fighting high rates were well organized there. The Star says:

"Peoria leaders of the Modern Woodmen of America today predicted that harmony would again rule in the organization following the action of the Toledo head camp in repealing the Chicago rates. The last of the delegates and visitors to the convention have returned home."

"While the insurgents forced abandonment of the proposed rate increase they lost in an attempt to cut the salaries of the head officers. Some of them are expected to continue a fight for a reduction, but since the 'real' insurgents, as one member expressed it, were fighting only against the increase in rates, and the manner in which it was 'put over,' it is predicted that the majority will be content to forget their differences."
